

1. No - Control was placed on small unmapped piles of stones west of the large mapped boulder.
2. Yes
3. Yes - On this map many of the 'dot knolls' are partially buried boulders that don't have a visible rounded lower half; read those course notes :)
4. Yes
5. No - Control was placed on the boulder to the east of the circle.
6. Yes - popular climbing spot with cool rocks!
7. No - Control was placed on the boulder SW of the cliff. The circled cliff is around the corner from the control and is a very large, unpassible cliff.
8. No - Control was placed on the cliff surrounding bare rock SW of the circle. The circled cliff was much smaller and angled more E-W rather than the more N-S orientation of the cliff the control was on.
9. No - Control was placed on the stony ground NW of the control. 'Stony ground' is often very large on this part of the map, but smaller than the boulders and cliffs in the area that were mapped. Bearings to the other rocks and the trail bend can help with this one.
10. Yes
11. Yes
12. No - the control was placed on the cliff that is SW of the SW-most boulder that was clued.
13. Yes

Actual control locations for 'No' controls marked in yellow on the map below.
